

B&C McKeown LTD

Product checklist for the quote calculator

For the meeting. Tick one answer on each row. The words already printed are what the calculator does today, using the public prices on bcmckeown.net. Prices below include VAT. If a price, size, or rule is wrong, write the right one in Notes.

Date _____ Filled in by _____ Phone 02844 615148

Answer these once. They apply to the whole calculator.

1. If the customer does not ask for spare material, what extra should we add? ☐ None ☐ 10% ☐ Other _____ Today the calculator uses 10% on decking, paving, cladding and trim, and none on fence boards and acrylic.
2. Doors and windows on cladding. ☐ Leave them out, so fewer boards are ordered ☐ Ignore them, so the full wall is ordered Today, entering a door or window reduces the board count. Boards are still sold at full length.
3. A short length. ☐ Still charge for the whole piece ☐ Cut it and charge only for the length used ☐ It depends on the product — use the ticks in the table
4. Delivery. ☐ Leave it off the quote ☐ Add it. How is it priced? _____

On each product, tick **one** of: cut to the size ordered, whole piece only, or round up to the next stock length. Then tick whether the price and the size are right.
